CHAPTER 8A (Cont'd)

2.3 When proposed location of installation is in the sidewalk area or in any other location where accuracy of bounds, bound points, property markers, etc., may be jeopardized. The Highway Surveyor shall require that a Registered Land Surveyor locate and property reference tie all such points prior to construction. Upon completion of all construction, the bound points, property markers, etc., will then be checked against the reference ties and any variation of said points will be duly recorded by the Registered land Surveyor. All legible copy of all field notes and ties recorded by the Registered land Surveyor, upon completion of this work, becomes the property of the Highway Surveyor. Original field notes are to be available for examination by duly authorized representatives of the Highway Surveyor, upon request.

6.5 Failure of the Highway Surveyor to assign an inspector to a trench opening or excavation site, on any way or street, accepted or unaccepted, or proposed way or street, does not, in any way relieve the permittee of responsibility of full compliance with the provisions of this by-law.

6.6 The fee and incidental expenses of the inspector shall be borne by the permittee and payable, by check or money order, to the Town of Dracut.

6.7 The permittee is solely responsible for notifying the Highway Surveyor in writing of any scheduled testing or any work under permit at least forty-eight (48) hours continuous hours prior to the time of the scheduled test. 7.3.3 The permittee may request a waiver of the requirement for uniformed police at the excavation site, in writing to the Police Chief, who must evaluate the request for a waiver and reply to the permittee in writing within five (5) days of receipt of request for waiver.

7.3.3.1 If the Police Chief grants the waiver, and at some future time during the progress of the work the Police Chief visits the excavation site and deems necessary that a uniformed police officer be present to maintain two-way traffic in the roadway, the Police Chief may immediately rescind, suspend or modify this waiver.

7.3.3.2 A request for a waiver does not relieve the permittee in any way of the responsibility of having uniformed police at the excavation site until said waiver has been granted in writing by the Police Chief.

7.3.3.3 The fee and incidental expenses of the uniformed police assigned to the excavation site shall be borne by the permittee and payable by check or money order to the Town of Dracut.

8.10 Sheeting, Lumber, sheeting shall be installed where trench excavation would cause failure to adjacent pavement. Unless otherwise directed, sheeting shall be driven to such a depth as to be two (2) feet below normal excavation. The sheeting shall be securely and satisfactorily braced to withstand all pressures to which it may be subject and shall be sufficiently tight to prevent any flow of water or material into the work space. Upon completion of the work sheeting shall be driven down or cut off eighteen (18) inches below pavement, grade and left in place, or as directed by the Highway Surveyor. No sheeting may be left so as to create a possible hazard to the safety of the public, obstruction to flow of water or hindrance to traffic of any kind.

Sec. 5 **Existing Building Sewers.** Old Building Sewers may be used in connection with new buildings only when they are found, on examination and test by the Board, to meet all requirements of these regulations.

Sec. 6 **Method of Construction for Building Sewer.** Whenever possible, the Building Sewer shall be brought to the building at an elevation below the basement floor. In all buildings in which any Building Drain is too low to permit gravity flow to the Public Sewer, sanitary sewage carried by such Building Drain shall be lifted by an approved means and discharged to the Building Sewer.

A minimum of 6-inch pipe shall be used for all Building Sewers.

The size, slope, alignment, materials of construction of a Building Sewer, and the methods to be used in excavating, placing of the pipe, jointing, testing, and backfilling the trench, shall all conform to the requirements of the building and plumbing code or other applicable rules and regulations of the town. The trench shall be kept dry at all times during construction. At no time shall groundwater in the trench be allowed to enter the sewer system.

At times when pipe installation is not in progress, the open ends of the pipe shall be closed with temporary, watertight plugs.

The connection of the Building Sewer into the Public Sewer shall be made at the "Y" connection. If no branch is available, a connection may be made by tapping the existing sewer, following approval of the Board. Cutting a hole in the pipe by hand is prohibited.

The applicant for the Building Sewer Permit shall notify the Board when the Building Sewer is ready for inspection and connection to the Public Sewer. The connection shall be made under the supervision of the Board or his representative.

All interior cleanouts shall be six (6") inches above the basement floor.

- Sec. 9 **Method of Construction for Sanitary Sewers.** All pipe shall be laid on an eight (8") inch crushed stone base (of 5/8" stone) and extending to mid-diameter with crushed stone on both sides for a full trench width. In instances where groundwater may back up into the basement, a well-compacted backfill seal may be placed around the portion of the Building Sewer, at the building. Backfill shall be placed in two (2') foot layers and each layer shall be well compacted. No backfill shall be placed until the work has been inspected by the Board.

No blocks or stones shall be used to support the pipe.

When water is present in a trench, a sump of crushed stones shall be constructed, and water shall be pumped at all times. The trench shall be kept dry at all times during construction.

Sec. 5 **Decisions of the Board.** If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in Section 4 of this Article, and which in the judgment of the Board may have a deleterious effect upon Wastewater Works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Board may:

- a) Reject the wastes,
- b) Require pretreatment to an acceptable condition for discharge to the public sewers,
- c) Require control over the quantities and rates of discharge, and/or
- d) Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges.

If the Board permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Board, and subject to the requirements of all applicable codes, ordinances, and laws. Said design shall be prepared by a qualified and competent Professional Engineer registered in the Commonwealth of Massachusetts.

Sec. 6 **Grease, Oil, and Sand Interceptors.** Grease, oil, and sand interceptors shall be provided when, in the opinion of the Board, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Board and shall be located as to be readily and easily accessible for cleaning and inspection. Sec. 8 **Control Manholes and/or Structures.** When required by the Board, the owner of any property serviced by a Building Sewer carrying Industrial Wastes shall install a suitable control manhole and/or structure, together with such necessary meters, and other appurtenances in the Building Sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole and/or structure, when required, shall be accessible and safely located, and shall be constructed in accordance with plans approved by the Board. The

manhole and/or structure shall be installed by the Owner at his expense, and shall be maintained by him so as to be safe and accessible at all times.

- Sec. 9 **Wastewater Sampling.** All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in this ordinance shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater," published by the American Public Health Association, and shall be determined at the control manhole and/or structure provided, or upon suitable samples taken at said control manhole and/or structure. In the event that no special manhole and/or structure has been required, the control and/or structure manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the Building Sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the Wastewater Works and to determine the existence of hazards to life, limb, and property. (The particular analyses involved will determine whether a twenty four (24) hour composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from 24-hour composites of all outfalls whereas pH's are determined from periodic grab samples.)
- Sec. 10 **Monitoring of Wastes.** All industries discharging into a Public Sewer shall perform such monitoring of their discharges as the Board and/or other duly authorized employees of the Town may reasonably require, including installation, use, and maintenance of monitoring equipment, keeping records and reporting the results of such monitoring to the Board. Such records shall be made available upon request by the Board to other agencies having jurisdiction over discharges to the Receiving Waters.
- Sec. 11 **Agreement between Town and Industry.** No statement contained in this Article shall be construed as preventing any special agreement or arrangement between the Town and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the Town for treatment, subject to payment therefore, by the industrial concern.

CHAPTER 18 WETLANDS

PROTECTION

I. Purpose

The purpose of this By-Law is to protect the wetlands, related water resources, and adjoining land areas in the Town of Dracut by controlling activities deemed by the Conservation Commission likely to have a significant or cumulative effect upon resource area values, including but not limited to the following: public or private water supply, ground water, flood control, erosion and sedimentation control, storm damage prevention, water quality, water pollution control, fisheries, shellfish, wildlife habitat, rare species habitat including rare plant species, agriculture, aquaculture, and recreation values, deemed important to the community (collectively, the "resource area values protected by this bylaw"). This bylaw is intended to utilize the Home Rule authority of this municipality to protect additional resource areas, for additional values, with additional standards and procedures stricter than those of the Wetlands Protection Act, M.G.L. Chapter 131 Section 40 and Regulations thereunder, 310 CMR 10.00.

II. Jurisdiction

Except as permitted by the Conservation Commission pursuant to this by-law, or as otherwise allowed in this bylaw, no person shall fill, dredge, build upon, degrade, discharge into or otherwise alter any Resource Area or Buffer Zone as defined in Section XI of this bylaw. It shall be assumed that significant adverse effect on the wetland values protected by this bylaw will result from any filling, dredging, building or other alteration within a Resource Area, land subject to flooding or inundation by groundwater or surface water, or within 50 feet of the edge of any freshwater wetland, vernal pool, bank, reservoir, pond of any size, land under waterbodies, or any marsh, wet meadow, bog or swamp. Said resource areas shall be protected whether or not they border surface waters.

**TOWN OF DRACUT
BY LAWS**

CHAPTER 18 (Cont'd)

The construction of any building may be prohibited within 50 feet of any bank, fresh water wetland, beach, flat, marsh, wet meadow, bog, swamp or lands bordering or on any estuary, creek, river, stream, or lake or any land under said waters.

Construction of a building shall not include any reconstruction, alteration, extension or structural change to a building existing on November 8, 1993.

III. Conditional Excepts

The application and permit required by this bylaw shall not be required for maintaining, repairing, or replacing, but not substantially changing or enlarging, an existing and lawfully located structure or facility used in the service of the public to provide electric, gas, water, telephone, telegraph, or other telecommunication services, provided that written notice has been given to the commission prior to commencement of work, and provided that the work conforms to performance standards and design specifications adopted by the Commission.

The application and permit required by this bylaw shall not be required for work performed or for normal maintenance or improvement of land which is lawfully in agricultural use (as defined in M.G.L. Chapter 131 Section 40 and Regulations 310 CMR 10.00), at the time the work takes place; provided that when there is doubt as to whether or nor an agricultural activity is exempt, written notice shall be given to the Commission prior to commencement of work and be subject to the Determination of Applicability process.

The application and permit required by this bylaw shall not be required for emergency projects necessary for the protection of the health and safety of the public, provided that the work is to be performed by or has been ordered to be performed by an agency of the Commonwealth or a political subdivision thereof; provided that advance notice, oral or written, has been given to the Commission prior to commencement of work or within 24 hours after commencement; provided that the Commission or its agent certifies the works as an emergency project; provided that the work is performed only for the time and place certified by the Commission for the limited purpose necessary to abate the emergency; and provided that within 21 days of commencement of

**TOWN OF DRACUT
BY LAWS**

CHAPTER 18 (Cont'd)

an emergency project, a permit application shall be filed with the commission for review as provided by this bylaw. Upon failure to meet these and other requirements of the Commission, the Commission may, after notice and a public hearing, revoke or modify an emergency project approval and order restoration and mitigation measures.

Other than stated in this section, the exceptions provided in the Wetland Protection Act, M.G.L. Chapter 131, Section 40, and Regulations, 310 CMR 10.00, shall not apply under this bylaw.

IV. Applications for Permits and Requests for Determination

Written application shall be filed with the Commission to perform such activities affecting resource areas protected by this bylaw. The permit application shall include such information and plans as are deemed necessary by the Commission to describe proposed activities and their effects on the resource areas protected by this bylaw. NO activities shall commence without receiving and complying with a permit issued pursuant to this bylaw.

The Commission in an appropriate case may accept as the permit application and plans under this bylaw the Notice of Intent and plans filed under the Wetlands Protection Act, M.G. L Chapter 131, Section 40, and Regulations, 310 Cmr 10.00.

Any person desiring to know whether or not a proposed activity or an area is subject to this bylaw may in writing, request a determination from the Commission. Such a Request for Determination (RFD) shall include information and plans as are deemed necessary by the Commission.

Upon receipt of a permit application or RFD, the Commission is authorized to require an applicant to pay a fee for the reasonable costs and expenses borne by the Commission for specific expert engineering and other consultant services deemed necessary by the Commission to come to a final decision on the application. This fee is called the consultant fee. The specific consultant services may include but are not limited to resource area survey and delineation, analysis of resource area values, including wildlife habitat evaluations, hydrogeologic and drainage analysts, and environmental or land use law.

**TOWN OF DRACUT
BY LAWS**

CHAPTER 18 (Cont'd)

The Commission may waive the filing fee, consultant fee, and costs and expenses for a permit application or RFD filed by a government agency.

The Commission may require the payment of the consultant fee at any point in its deliberations prior to a final decision. The applicant shall pay the fee to be put into a consultant services account of the Commission which may be drawn upon by the Commission for specific consultant services approved by the Commission at one of its public meetings

The exercise of discretion by the Commission in making its determination to require the payment of a consultant fee shall be based upon its reasonable finding that additional information acquirable only through outside consultants would be necessary for the making of an objective decision.

The Commission shall return any unused portion of the consultant fee to the applicant unless the Commission decides at a public meeting that other action is necessary. Any applicant aggrieved by the imposition of, or size of, the consultant fee, or any act related thereto, may appeal according to the provisions of the Massachusetts General Laws.

V. Notice and Hearings

The Commission shall conduct a public hearing on any permit application or RFD, with a written notice given at the expense of the applicant, five business days prior to the hearing, in a newspaper of general circulation in the municipality.

The Commission shall commence the public hearing within 21 days from the receipt of a completed permit application or RFD unless an extension is authorized in writing by the applicant.

The Commission shall issue its permit or determination in writing within 21 days of the close of the public hearing thereon unless an extension is authorized in writing by the applicant.

The Commission in an appropriate case may combine its hearing under this bylaw with the hearing conducted under the Wetlands Protection Act, M.G. L. 131, Section 40, and Regulations, 310 CMR 10.00.

**TOWN OF DRACUT
BY LAWS**

CHAPTER 18 (Cont'd)

The Commission shall have the authority to continue the hearing to a certain date announced at the hearing, for reasons stated at the hearing which may include receipt of additional information from the applicant or others deemed necessary by the Commission in its discretion, or comments and recommendations of the boards and officials listed in VI.

VI. Coordination with Other Boards

Any person filing a permit application or filing a request for determination of applicability with the Commission may be required to provide a copy thereof at the same time, by certified mail (return receipt requested) or hand delivery, to the Board of Selectmen, Planning Board, Board of Health, the Building Inspector, and Town Engineer. The Commission shall consider any and all comments as they are submitted within the statutory time limits of M.G. L. Chapter 131, Section 40. The applicant shall have the right to receive any comments and recommendations, and to respond to them at a hearing of the Commission, prior to final action.

VII. Permits and Conditions

If the Commission, after a public hearing, determines that the activities which are subject to the permit application or the land and water uses which will result therefrom are likely to have a significant individual or cumulative effect upon the resource area values protected by this bylaw, the Commission, within 21 days of the close of the hearing, shall issue or deny a permit for the activities requested. If it issues a permit, the Commission shall impose conditions which the Commission deems necessary or desirable to protect those values, and all activities shall be done in accordance with those conditions. The Commission shall take into account the cumulative adverse effects of loss, degradation, isolation, and replication of protected areas throughout the community and the watershed, resulting from past activities, permitted and exempt, and foreseeable future activities.

The Commission is empowered to deny a permit for failure to meet the requirements of this bylaw; for failure to submit necessary information and plans requested by the Commission; for failure to meet the designs specifications, performance standards, and other requirements in regulations of the Commission; for failure

**TOWN OF DRACUT
BY LAWS**

CHAPTER 18 (Cont'd)

to avoid or prevent unacceptable significant or cumulative effects upon the resource area values protected by this bylaw; and where no conditions are adequate to protect those values. Due consideration shall be given to any demonstrated hardship on the applicant by reason of denial, as presented at the public hearing.

The Commission is empowered to require the use of the 1987 Army Corps of Engineers Wetlands Delineation Method, Section F. "Atypical Situations" in some instances where conditions exist that preclude the use of the Massachusetts delineation method using vegetation as a wetlands indicator.

Such instances include but are not limited to disturbed sites, filled wetlands, or naturally occurring events that result in the creation or alteration of wetlands.

To prevent wetlands losses, the Commission shall require applicants to avoid wetlands alteration wherever feasible; shall minimize wetlands alteration; and, where alteration is unavoidable, shall require full mitigation. The Commission may authorize or require replication of wetland as a form of mitigation, but only with adequate security, professional design, and monitoring to assure success, because of the high likelihood of failure of replication.

A permit shall expire three years from the date of issuance. Notwithstanding the above, the Commission in its discretion may issue a permit expiring five years from the date of issuance for recurring or continuous maintenance work, provided that annual notification of time and location of work is given to the Commission. Any permit may be renewed once for an additional one year period, provided that a request for a renewal is received in writing by the Commission prior to expiration. Notwithstanding the above, a permit may contain requirements which shall be enforceable for a stated number of years, indefinitely, or until permanent protection is in place, and shall apply to all owners of the land.

**TOWN OF DRACUT
BY LAWS**

CHAPTER 18 (Cont'd)

For good cause the Commission may revoke or modify a permit or determination issued under this bylaw after notice to the holder of the permit or determination, notice to the public, abutters, and town boards, pursuant to V and VI, and a public hearing.

The Commission in an appropriate case may combine the permit or determination issued under this bylaw with the Order of Conditions or Determination of Applicability issued under the Wetlands Protection Act, M.G.L. Chapter 131, Section 40, and Regulations, 310 CMR 10.0.

No work in any permit application shall be undertaken until the permit issued by the Commission with respect to such work has been recorded in the registry of deeds or, if the land affected is registered land, in the registry section of the land court for the district wherein the land lies, and until the holder of the permit certifies in writing to the Commission that the permit has been recorded.

VIII. Regulations

After public notice and public hearing, the Commission shall promulgate rules and regulations to effectuate the proposes of this bylaw. Failure by the Commission to promulgate such rules and regulations or a legal declaration of their invalidity by a court of law shall not act to suspend or invalidate the effect of this bylaw.

At a minimum these regulations shall define key terms in this bylaw not inconsistent with the bylaw and procedures governing the amount and filing of fees.

CHAPTER 24

STORMWATER AND EROSION CONTROL BYLAW

Section I. Purpose

A. The purpose of this By-Law is to protect, maintain and enhance the public health, safety, environment and general welfare of the Town by establishing minimum requirements and procedures to control the adverse effects of soil erosion and sedimentation, construction site runoff, increased post-development stormwater runoff and nonpoint source pollution associated with new development and redevelopment. It has been determined that proper management of stormwater runoff will minimize damage to public and private property and infrastructure, safeguard the public health, safety, environment and general welfare of the public, protect water and aquatic resources, protect and enhance wildlife habitat, and promote groundwater recharge to protect surface and groundwater drinking supplies. This Bylaw seeks to meet that purpose through the following objectives:

1. Establish a mechanism by which the municipality can monitor and ensure compliance with requirements of its National Pollutant Discharge Elimination System (NPDES) General Permit for Stormwater Discharges from Small Municipal Separate Storm Sewer Systems (MS4) and other applicable State and Federal mandates.
2. Establish decision-making processes surrounding land development activities that protect the integrity of the watershed and preserve the health of water resources.
3. Require that new development, redevelopment and other land alteration activities maintain the after-development runoff characteristics as equal to or less than the pre-development runoff characteristics where appropriate in order to reduce flooding, stream bank erosion, siltation, nonpoint source pollution, property damage, and to maintain the integrity of stream channels and aquatic habitats.
4. Establish minimum post-development stormwater management standards and design criteria for the regulation and control of stormwater runoff quantity and quality; establish minimum design criteria for the protection of properties and aquatic resources downstream from land development and land conversion activities from damages due to alterations in volume, velocity, frequency,

TOWN OF DRACUT
BY LAWS

CHAPTER 24 (Cont'd):

duration, and peak flow rate of storm water runoff; establish minimum design criteria for measures to eliminate or minimize to the extent feasible nonpoint source pollution from stormwater runoff which would otherwise degrade water quality.

5. Establish design and application criteria for the construction and use of structural stormwater control facilities that can be used to meet or exceed the minimum post-development stormwater management standards, as established by the Massachusetts Department of Environmental Protection (DEP) and by any site plan or subdivision requirements, bylaws or rules and regulations as adopted by the Dracut Planning Board, Board of Selectmen, Zoning Board of Appeals, Dracut Conservation Commission or any relevant land use board or committee..

6. Encourage the use of nonstructural stormwater management, better site design practices or "low-impact development practices", such as reducing impervious cover, increasing site-wide infiltration, and preserving open space and other natural areas, to the maximum extent practicable.

7. Promote water conservation through the re-use of stormwater for irrigation.

8. Establish provisions that require practices that eliminate soil erosion and sedimentation and control the volume and rate of stormwater runoff resulting from land disturbance activities.

9. Establish provisions to ensure that soil erosion and sedimentation control measures and stormwater runoff control practices are incorporated into the site planning and design process and are implemented and maintained.

10. Establish provisions for the long-term responsibility for and maintenance of structural stormwater control facilities and nonstructural stormwater management practices to ensure that they continue to function as designed, are maintained, and pose no threat to public safety or the environment.

11. Establish provisions to ensure there is an adequate funding mechanism, including surety, for the proper review, inspection and long-term maintenance of stormwater facilities implemented as part of this By-Law.

TOWN OF DRACUT
BY LAWS

CHAPTER 24 (Cont'd):

12. Establish administrative procedures for the submission, review, approval or disapproval of stormwater management plans, erosion and sediment controls, and for the inspection of approved active projects, and long-term follow up; establish certain administrative procedures and fees for the submission, review, approval, or disapproval of stormwater plans, inspection of construction sites, and the inspection of approved projects.

13. Ensure that construction and waste materials, toxic materials, hazardous materials, and other pollutants are prevented from mixing with stormwater runoff, which would degrade water quality.

14. Establish certain administrative procedures and fees for the submission, review, approval or disapproval of stormwater plans and the inspection of approved projects.

15. Establish the Town of Dracut's legal authority and capacity to ensure compliance with the provisions of this By-Law through funding, permitting, inspection, monitoring, and enforcement.

B. Compatibility with other permit and bylaw requirements.

This bylaw is not intended to interfere with, abrogate or annul any other bylaw, rule or regulation, statute or other provision of the law. The requirements of this bylaw shall be considered minimum requirements and where any provision of this bylaw imposes restrictions different from those imposed by any other bylaw, rule, regulation or other provision of law, whichever provisions are more restrictive or impose higher protective standards for human health, public safety or the environment shall be considered to take precedence.

Section II Definitions

The following definitions shall apply in the interpretation and implementation of this By-Law. Additional definitions may be adopted by separate regulation:

ALTER: Any activity that will measurably change the ability of a ground surface area to absorb water, will change existing surface drainage patterns, or will increase or decrease the rate or volume of flow from a site. Alter may be similarly represented as "alteration of drainage characteristics," and "conducting land disturbance activities."

TOWN OF DRACUT
BY LAWS

CHAPTER 24 (Cont'd):

APPLICANT: A property owner or duly designated agent who has filed an application for a stormwater management permit with the Town of Dracut.

BEST MANAGEMENT PRACTICE (BMP): Structural, non-structural and managerial techniques that are recognized to be the most effective and practical means to prevent and/or reduce increases in stormwater volumes and flows, reduce point source and nonpoint source pollution, and promote stormwater quality and protection of the environment. "Structural" BMPs are devices that are engineered and constructed to provide temporary storage and treatment of stormwater runoff. "Nonstructural" BMPs use natural measures to reduce pollution levels, do not require extensive construction efforts, and/or promote pollutant reduction by eliminating the pollutant source.

BETTER SITE DESIGN: Site design approaches and techniques, including low-impact development (LID) that can reduce a site's impact on the watershed through the use of nonstructural stormwater management practices. Better site design includes conserving and protecting natural areas and green space, reducing impervious cover, using natural features for stormwater management, and providing site-wide infiltration.

CONVEYANCE: Any structure or device, including pipes, drains, culverts, curb breaks, paved swales or man-made swales of all types designed or utilized to move or direct stormwater runoff or existing water flow.

DEVELOPMENT: Any construction that disturbs or alters a parcel of land.

DISTURBANCE OF LAND (Land Disturbance): Any action causing any removal of vegetation including tree and brush clearing; importation, removal or redistribution of soil, sand, rock, gravel or similar earth material.

EMERGENCY REPAIR: A condition that poses a threat to public health and/or safety. Such conditions include, but are not limited to, a utility gas leak, electric problem, collapsed or blocked drain, water leak, etc.

EXISTING LAWN: Grass area which has been maintained and mowed in the previous two years.

TOWN OF DRACUT
BY LAWS

CHAPTER 24 (Cont'd):

ILLCIT CONNECTION: Any drain or conveyance, whether on the surface or subsurface, which allows an illicit discharge to enter the municipal storm drain system, including, but not limited to, any conveyance which allows any non-stormwater discharge, such as sewage, processed wastewater and other wastewater products to enter the municipal storm drain system and any connections to the municipal storm drain system from indoor drains and sinks, regardless of whether said drain or connection has been previously allowed, permitted, or approved by an authorized enforcement agency.

ILLCIT DISCHARGE: Any direct or indirect non-stormwater discharge to the storm drain system or water body, except as exempted in the stormwater rules and regulations.

IMPERVIOUS/IMPERVIOUS COVER: Any material or structure on, above or below the ground that prevents water from infiltrating through the underlying soil. Impervious surface is defined to include, without limitation: paved surfaces (parking lots, sidewalks, and driveways), concrete, brick, stone, and roof tops.

INFILTRATION: The act of conveying surface water into the ground to permit groundwater recharge and the reduction of stormwater runoff from a project site.

LOW IMPACT DEVELOPMENT (LID): An ecosystem-based approach to land development and stormwater management that ensures that each development site is designed to protect, or restore, the natural hydrology of the site. This can be achieved by the incorporation of non-structural and natural approaches to new and redevelopment projects to reduce adverse effects on water quality and the natural environment by conserving natural areas, reducing impervious cover and better integrating stormwater treatments.

MASSACHUSETTS STORMWATER MANAGEMENT STANDARDS: The latest version as may be amended from time to time of the Stormwater Management Standards and accompanying Stormwater Handbook issued by the Department of Environmental Protection pursuant to authority under the Wetlands Protection Act, M.G.L. c. 131, § 40, and the Massachusetts Clean Waters Act, M.G.L. c. 21, §§ 26-56. The Stormwater Management Standards are incorporated in the Wetlands Protection Act Regulations, 310 CMR 10.05(6)(k) and the Water Quality Certification Regulations, 314 CMR 9.06(6)(a) and

MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4) or MUNICIPAL STORM DRAIN SYSTEM: The system of conveyances designed or used for collecting or conveying stormwater, including any road with a drainage system, street, gutter, curb, inlet, piped storm drain, pumping facility, retention or detention basin, natural or man-made or altered drainage channel, reservoir, and other drainage structure that together comprise the storm drainage system owned or operated by the Town of Dracut.

NEW DEVELOPMENT: Any construction or land disturbance of a parcel of land, including all projects requiring municipal site plan review, that is currently in a natural vegetated state and does not currently contain alteration by man-made activities at the location of the proposed land disturbance.

NONPOINT SOURCE POLLUTION: Pollution from many diffuse sources caused by rainfall, snowmelt, or other method of pollutant transport moving over and through the ground. As the runoff moves, it picks up and carries away natural and human-made pollutants, finally depositing them into water resource areas.

NON-STORMWATER DISCHARGE: Discharge to the Town of Dracut municipal storm drain system not composed entirely of stormwater.

NORMAL MAINTENANCE: Activities that are regularly scheduled to maintain the health and condition of a landscaped area. Examples include removal of weeds or invasive species, pruning, mowing, raking, and other activities that are done at regular intervals within the course of a year.

PERSON: Includes any individual, group of individuals, association, partnership, corporation, company, business organization, trust, estate, the Commonwealth or political subdivision thereof to the extent subject to town bylaws, administrative agency, public or quasi-public corporation or body,

PRE-DEVELOPMENT: The conditions that exist prior to the proposed disturbance activity. Where phased development or plan approval occurs (preliminary grading, roads and utilities, etc.), the

TOWN OF DRACUT
BY LAWS

existing conditions at the time prior to the first plan submission shall establish pre-development conditions.

POST-DEVELOPMENT: The conditions that reasonably may be expected or anticipated to exist after completion of the land development activity in accordance with approved plans on a specific site or tract of land. Post-development refers to the phase of a new development or redevelopment project after completion, and does not refer to the construction phase of a project.

RECHARGE: The replenishment of underground water reserves.

RECONSTRUCTION: Any action causing complete removal and replacement of paved surfaces, such as driveways, parking areas and roads.

REDEVELOPMENT: Any construction, alteration, or improvement on a previously-developed site which contains impervious cover, including all projects requiring Town of Dracut reviews and provided that the activity does not involve an increase in the net amount of impervious cover.

RUNOFF: Rainfall or snowmelt water flowing over the ground surface or other source which may result in transport of pollutants.

SITE: The entire parcel of land being developed and/or where land-disturbing activities are, or will be performed.

STOCKPILING: The storage of unsecured material for future use, excluding the storage of materials 10 cubic yards or less when secured utilizing erosion controls to prevent erosion of material.

STORMWATER MANAGEMENT: The use of structural or non-structural practices that are designed to control or treat stormwater runoff pollutant loads, discharge volumes, and/or peak flow discharge rates. Stormwater Management includes the use of Low-Impact Development (LID) management practices.

STORMWATER PERMITTING AUTHORITY (SWPA): The entity who reviews and issues stormwater management permits in accordance with this bylaw and the related rules and regulations.

TOWN OF DRACUT

CHAPTER 24 (Cont'd):

STORMWATER MANAGEMENT PERMIT (SMP): A permit issued by the Stormwater Permitting Authority (SWPA), after review of an application, plans, calculations, and other supporting documents, which is designed to protect the environment of the Town from the deleterious effects of uncontrolled and untreated stormwater runoff.

Section III. Authority

This By-Law is adopted under authority granted by the Home Rule Amendment of the Massachusetts Constitution and the Home Rule statutes, and pursuant to the regulations of the federal Clean Water Act found at 40 CFR 122.34., and as authorized by the residents of the Town of Dracut at Town Meeting dated June 5, 2017.

Town departments shall provide input to the Stormwater Permitting Authority, upon request.

Where a project is subject to Site Plan Approval, Definitive Subdivision or Special Permit Approval from the Planning Board, Board of Selectmen, the Zoning Board of Appeals and/or any application to the Conservation Commission, the Stormwater Regulations adopted by the Stormwater Permitting Authority shall apply and the stormwater review shall be completed as part of the Planning Board, Board of Selectmen and Zoning Board of Appeals process provided that the applicable Board also finds that the activity is in compliance with any additional performance standards contained in the Regulations promulgated to implement this By-Law.

B. For projects not subject to Site Plan Approval, Definitive Subdivision or Special Permit Approval from the Planning Board, Board of Selectmen, Zoning Board of Appeals or any application to the Conservation Commission, this By-Law shall be applicable to all new development and redevelopment, land disturbance and any other activity that may result in an increased amount of stormwater runoff or pollutants, or changes to drainage characteristics causing an increases in runoff, flowing from a parcel of land,

A development shall not be segmented or phased in a manner to avoid compliance with the By-Law.

C. Storm Water Management Permit Thresholds - A Storm Water Management Permit shall be required for any of the following, except for an activity exempt per Section V:

- ☐ to protect existing watercourses within the Town of Dracut by preventing pollutants from entering these resource areas;
- ☐ to prohibit illicit connections and unauthorized discharges to the MS4;
- ☐ to require the removal of all such illicit connections;
- ☐ to comply with state and federal statutes and regulations relating to storm water discharges; and
- ☐ to establish the legal authority to ensure compliance with the provisions of this by-law through inspection, monitoring, and enforcement.

Page 6 of 9

SECTION 10: Notification of Spills

Notwithstanding other requirements of local, state or federal law, as soon as a person responsible for a facility or operation, or responsible for emergency response for a facility or operation has information of or suspects a release of materials at that facility or operation resulting in or which may result in discharge of pollutants to the municipal drainage system or waters of the Commonwealth, the person shall take all necessary steps to ensure containment, and cleanup of the release. The reporting person shall provide to the Authorized Enforcement Agency written confirmation of all telephone, facsimile or in-person notifications within three business days thereafter. If the discharge of prohibited materials is from a commercial or industrial facility, the facility owner or operator of the facility shall retain on-site a written record of the discharge and the actions taken to prevent its recurrence. Such records shall be retained for at least three years.

SECTION 11: Enforcement

The Board of Selectmen through the STORMWATER PERMITTING AUTHORITY (SPA) shall enforce this by-law, regulations, orders, violation notices, and enforcement orders, and may pursue all civil and criminal remedies for such violations.
